PROFESSIONAL SUMMARY

Data Science graduate student skilled in Python, SQL, machine learning, statistical analysis, AI agents, and health data analysis. Develops predictive models, evaluation workflows, and data visualizations to support research, quality review, and decision-making.

TECHNICAL SKILLS

Python • SQL • Pandas • Scikit-Learn • Machine Learning • Statistical Analysis • Tableau • R • SQLite • GitHub • AI Agents

EDUCATION

University of Houston- Clear Lake **Houston, TX**
Master of Science in Data Science *Dec. 2026*

University of Houston- Clear Lake **Houston, TX**
Master of Arts in Cross-Cultural and Global Studies
Master's Thesis: Comparing Finnish and Texas Education Systems
Applied comparative data analysis to research education systems, interpret findings, and evaluate policy outcomes.
Study Abroad in Oman - Focus on the Omani K-12 education system and Universities

University of Houston- Clear Lake **Houston, TX**
Bachelor of Science in Interdisciplinary Studies, Certified EC-6, ESL, Gifted and Talented
Study Abroad in Oman - Focus on Omani culture, religion, and infrastructure

Helsinki Summer School, University of Helsinki **Helsinki, Finland**
International Student
International program resulting in a collaborative paper, *"Finnish Education System from the Perspective of Comparative Education Research—Policy Reform: Standardized Testing.* "
Analyzed qualitative and quantitative datasets and communicated findings in a collaborative research paper.

DATA SCIENCE AND ANALYTICS PROJECTS

LeafTutor QC AI Agent Capstone
Developed an AI agent to evaluate tutoring conversations across six quality dimensions and generate structured JSON results.
Built a Python/SQL workflow for AI evaluation, human review, and prompt approval; tested with version control in GitHub.

Heart Disease Prediction Model – Python, Scikit-Learn, Pandas
Developed and evaluated predictive machine learning models using Python, Scikit-Learn, and Pandas for heart disease prediction.

Multi-Year Road Race Dataset Visualization – Tableau, Excel
Built interactive Tableau dashboards to analyze multi-year datasets, identify trends, and interpret key performance metrics.
Designed data visualizations to communicate analytical findings to non-technical audiences and support decision-making.

DMV Database Design Project – SQL, Microsoft
Designed and implemented a SQL relational database using entity-relationship diagrams to define data structures.
Built normalized tables with primary and foreign keys to ensure data integrity and support relational data analysis.

Vaccination Rate Analysis – Python, Pandas, Matplotlib
Analyzed county-level COVID-19 vaccination datasets using Python and Pandas to identify public health trends.
Applied statistical tests to compare groups and visualized results with Matplotlib to communicate research findings.

WORK EXPERIENCE

Clear Creek ISD **League City, TX**
Substitute Teacher, K-12 *2024-Present*

San Leon Elementary, Dickinson ISD **San Leon, TX**
Elementary Teacher *2019-2024*

Clear Creek ISD **League City, TX**
Substitute Teacher, K-5 *2018-2019*

Summer of Hope Program, Worldwide Mental Health **Houston, TX**
ESL Teacher, K-4 *2018*
Delivered ESL instruction to Syrian and Iraqi refugee children ages 5-18.
