PROFESSIONAL SUMMARY

Data Science graduate student skilled in Python, SQL, Tableau, machine learning, and statistical analysis. Experienced in transforming complex data into actionable insights through predictive modeling and data visualization to support strategic business decisions.

TECHNICAL SKILLS

Python • SQL • Tableau • Pandas • Scikit-Learn • Excel • Machine Learning • R • Statistical Analysis

EDUCATION

University of Houston- Clear Lake <i>Master of Science in Data Science</i>	Houston, TX Dec. 2026
University of Houston- Clear Lake <i>Master of Arts in Cross-Cultural and Global Studies</i> <i>Master's Thesis: Comparing Finnish and Texas Education Systems</i> Applied comparative data analysis to evaluate education systems and policy outcomes <i>Study Abroad in Oman</i> - Focus on the Omani K-12 education system and Universities	Houston, TX 2020 2019
University of Houston- Clear Lake <i>Bachelor of Science in Interdisciplinary Studies, Certified EC-6, ESL, Gifted and Talented</i> <i>Study Abroad in Oman</i> - Focus on Omani culture, religion, and infrastructure	Houston, TX 2017
Helsinki Summer School, University of Helsinki <i>International Student</i> International program resulting in collaborative paper, " <i>Finnish Education System from the Perspective of Comparative Education Research—Policy Reform: Standardized Testing.</i> " Analyzed qualitative and quantitative datasets to support research findings	Helsinki, Finland 2018

WORK EXPERIENCE

Clear Creek ISD <i>Substitute Teacher, K-12</i>	League City, TX 2024-Present
San Leon Elementary, Dickinson ISD <i>Elementary Teacher</i>	San Leon, TX 2019-2024
Clear Creek ISD <i>Substitute Teacher, K-5</i>	League City, TX 2018-2019
Summer of Hope Program, Worldwide Mental Health <i>ESL Teacher, K-4</i> Delivered ESL instruction to Syrian and Iraqi refugee children ages 5-18.	Houston, TX 2018
University of Houston- Clear Lake <i>Graduate Teaching Assistant</i>	Houston, TX 2017

DATA SCIENCE AND ANALYTICS PROJECTS

Heart Disease Prediction Model – Python, Scikit-Learn, Pandas Developed and evaluated machine learning models in Python for heart disease prediction.	2026
Multi-Year Road Race Dataset Visualization – Tableau, Excel Built interactive dashboards in Tableau to analyze trends and key metrics. Designed clear visualizations to communicate insights and support decision-making.	2026
DMV Database Design Project – SQL, Microsoft Designed and implemented a relational database system using ER diagrams. Built normalized tables with primary and foreign keys to ensure data integrity	2025
Vaccination Rate Analysis – Python, Pandas, Matplotlib Analyzed county-level COVID-19 vaccination data to identify trends. Applied statistical tests and created visualizations to compare groups.	2025
